A Manual for Writers

By **JOHN M. MANLY**
*Head of the Department of English of
the University of Chicago*

and **JOHN A. POWELL**
of the University of Chicago Press

A book designed to aid authors and all others who are concerned with the writing of English. It aims to answer the practical questions that constantly arise in the preparation of manuscripts for publication, business letters, and any sort of composition where correctness of form is an important element.

It treats in a clear and convenient way the matters of grammar, spelling, and general form about which writers need to be informed, and gives full directions on the preparation of "copy" for the printer and the correcting of proof. The chapter on letter-writing is unique and gives just the help that is constantly wanted and that is not found in other manuals.

Bausch and Lomb

BALOPTICON

THE PERFECT STEREOPTICON

Our recent application of the gas-filled Mazda lamp to projection gives the Balopticon an illuminator far superior to the old-style arc lamp—and one using less current for equal power. The New Combined Balopticon projects either lantern slides or opaque objects, with instant interchange. It has the new lamp of 1,000 watts, using but 9 amperes of current, instead of 35 amperes as used by the arc lamp of equal illumination, and giving much better results on alternating current. Price \$120.00.

Other models for lantern slide or opaque projection from \$20.00 up.
